

The background features a repeating pattern of light gray Bitcoin coins, each showing the profile of a man with a beard. A thick, yellow, dashed line representing a road winds across the image, starting from the top left, curving around the text, and ending at the bottom right.

OCOS UK Roadmap

OCOS UK Roadmap

Q4 2023: Foundational Setup
and Infrastructure
Development

Smart Contract Audits

Conduct thorough audits of OCOS UK's smart contracts to ensure maximum security and compliance with industry standards.

2

1

Technical Infrastructure Completion

Finalize the technical foundation, including setting up blockchain nodes and secure backend services.

3

Whitepaper Finalization

Release the final version of the OCOS UK whitepaper to outline the technical, economic, and strategic aspects of the project.

4

Operations

This phase involves the daily operations of OCOS UK. It includes monitoring the technological infrastructure, managing resources efficiently, and coordinating teams.

Q1 2024: Token Launch and Initial Ecosystem Integration

Community Engagement and Token Distribution

Launch community campaigns, distribute airdrops, and incentivize early adopters to drive the initial phase of token distribution.

Binance Smart Chain Launch

Officially launch OCOS UK on Binance Smart Chain, leveraging the BEP-20 standard for fast, low-fee transactions.

Liquidity Pool Establishment

Create liquidity pools on decentralized exchanges (DEX) like PancakeSwap to facilitate token trading and liquidity management.

Q2 2024: Metaverse and NFT Integrations

First Metaverse Integration

Begin integrating OCOS UK with leading metaverse platforms, enabling digital ownership, NFT trading, and in-game economies.

2

3

Governance Implementation

Enable token holders to participate in the governance process through decentralized voting on major strategic decisions.

1

NFT Platform Collaboration

Partner with established NFT marketplaces to allow seamless NFT minting, trading, and ownership transfers using OCOS UK tokens.

Q3 2024: Enhanced Visibility and Exchange Listings

1

Listings on Major Platform

Get OCOS UK listed on CoinMarketCap and CoinGecko to increase project visibility and credibility in the global market.

2

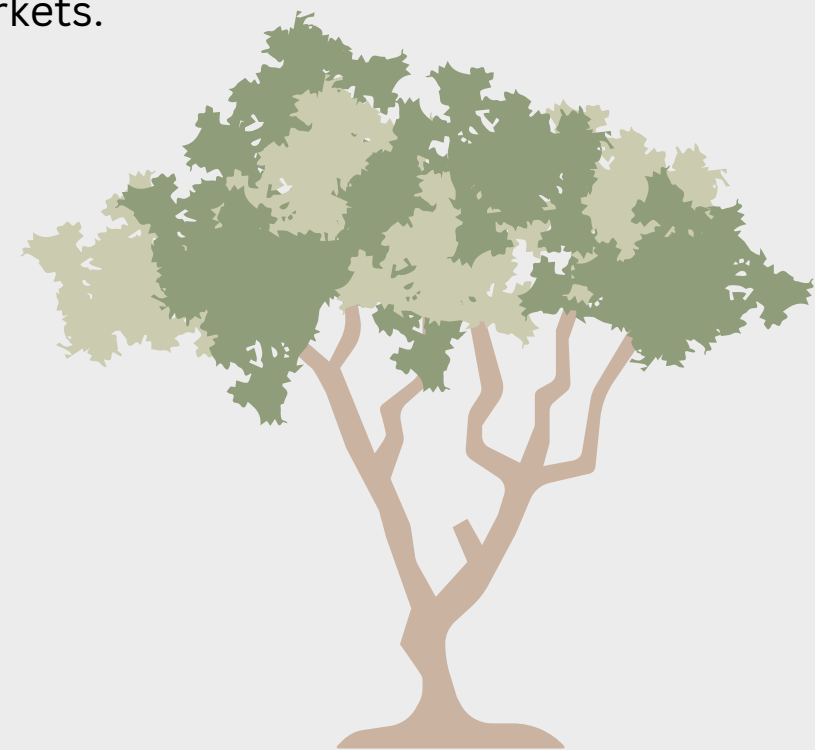

Centralized Exchange Listings

Explore and secure listings on popular centralized exchanges (CEX) such as Binance, Kraken, and Coinbase to increase token accessibility.

3

Marketing and Global Outreach

comprehensive marketing campaign aimed at expanding OCOS UK's presence in both crypto and mainstream markets.

Q4 2024: Strategic Partnerships and In-Game Economy Launch

In-Game Economy Implementation

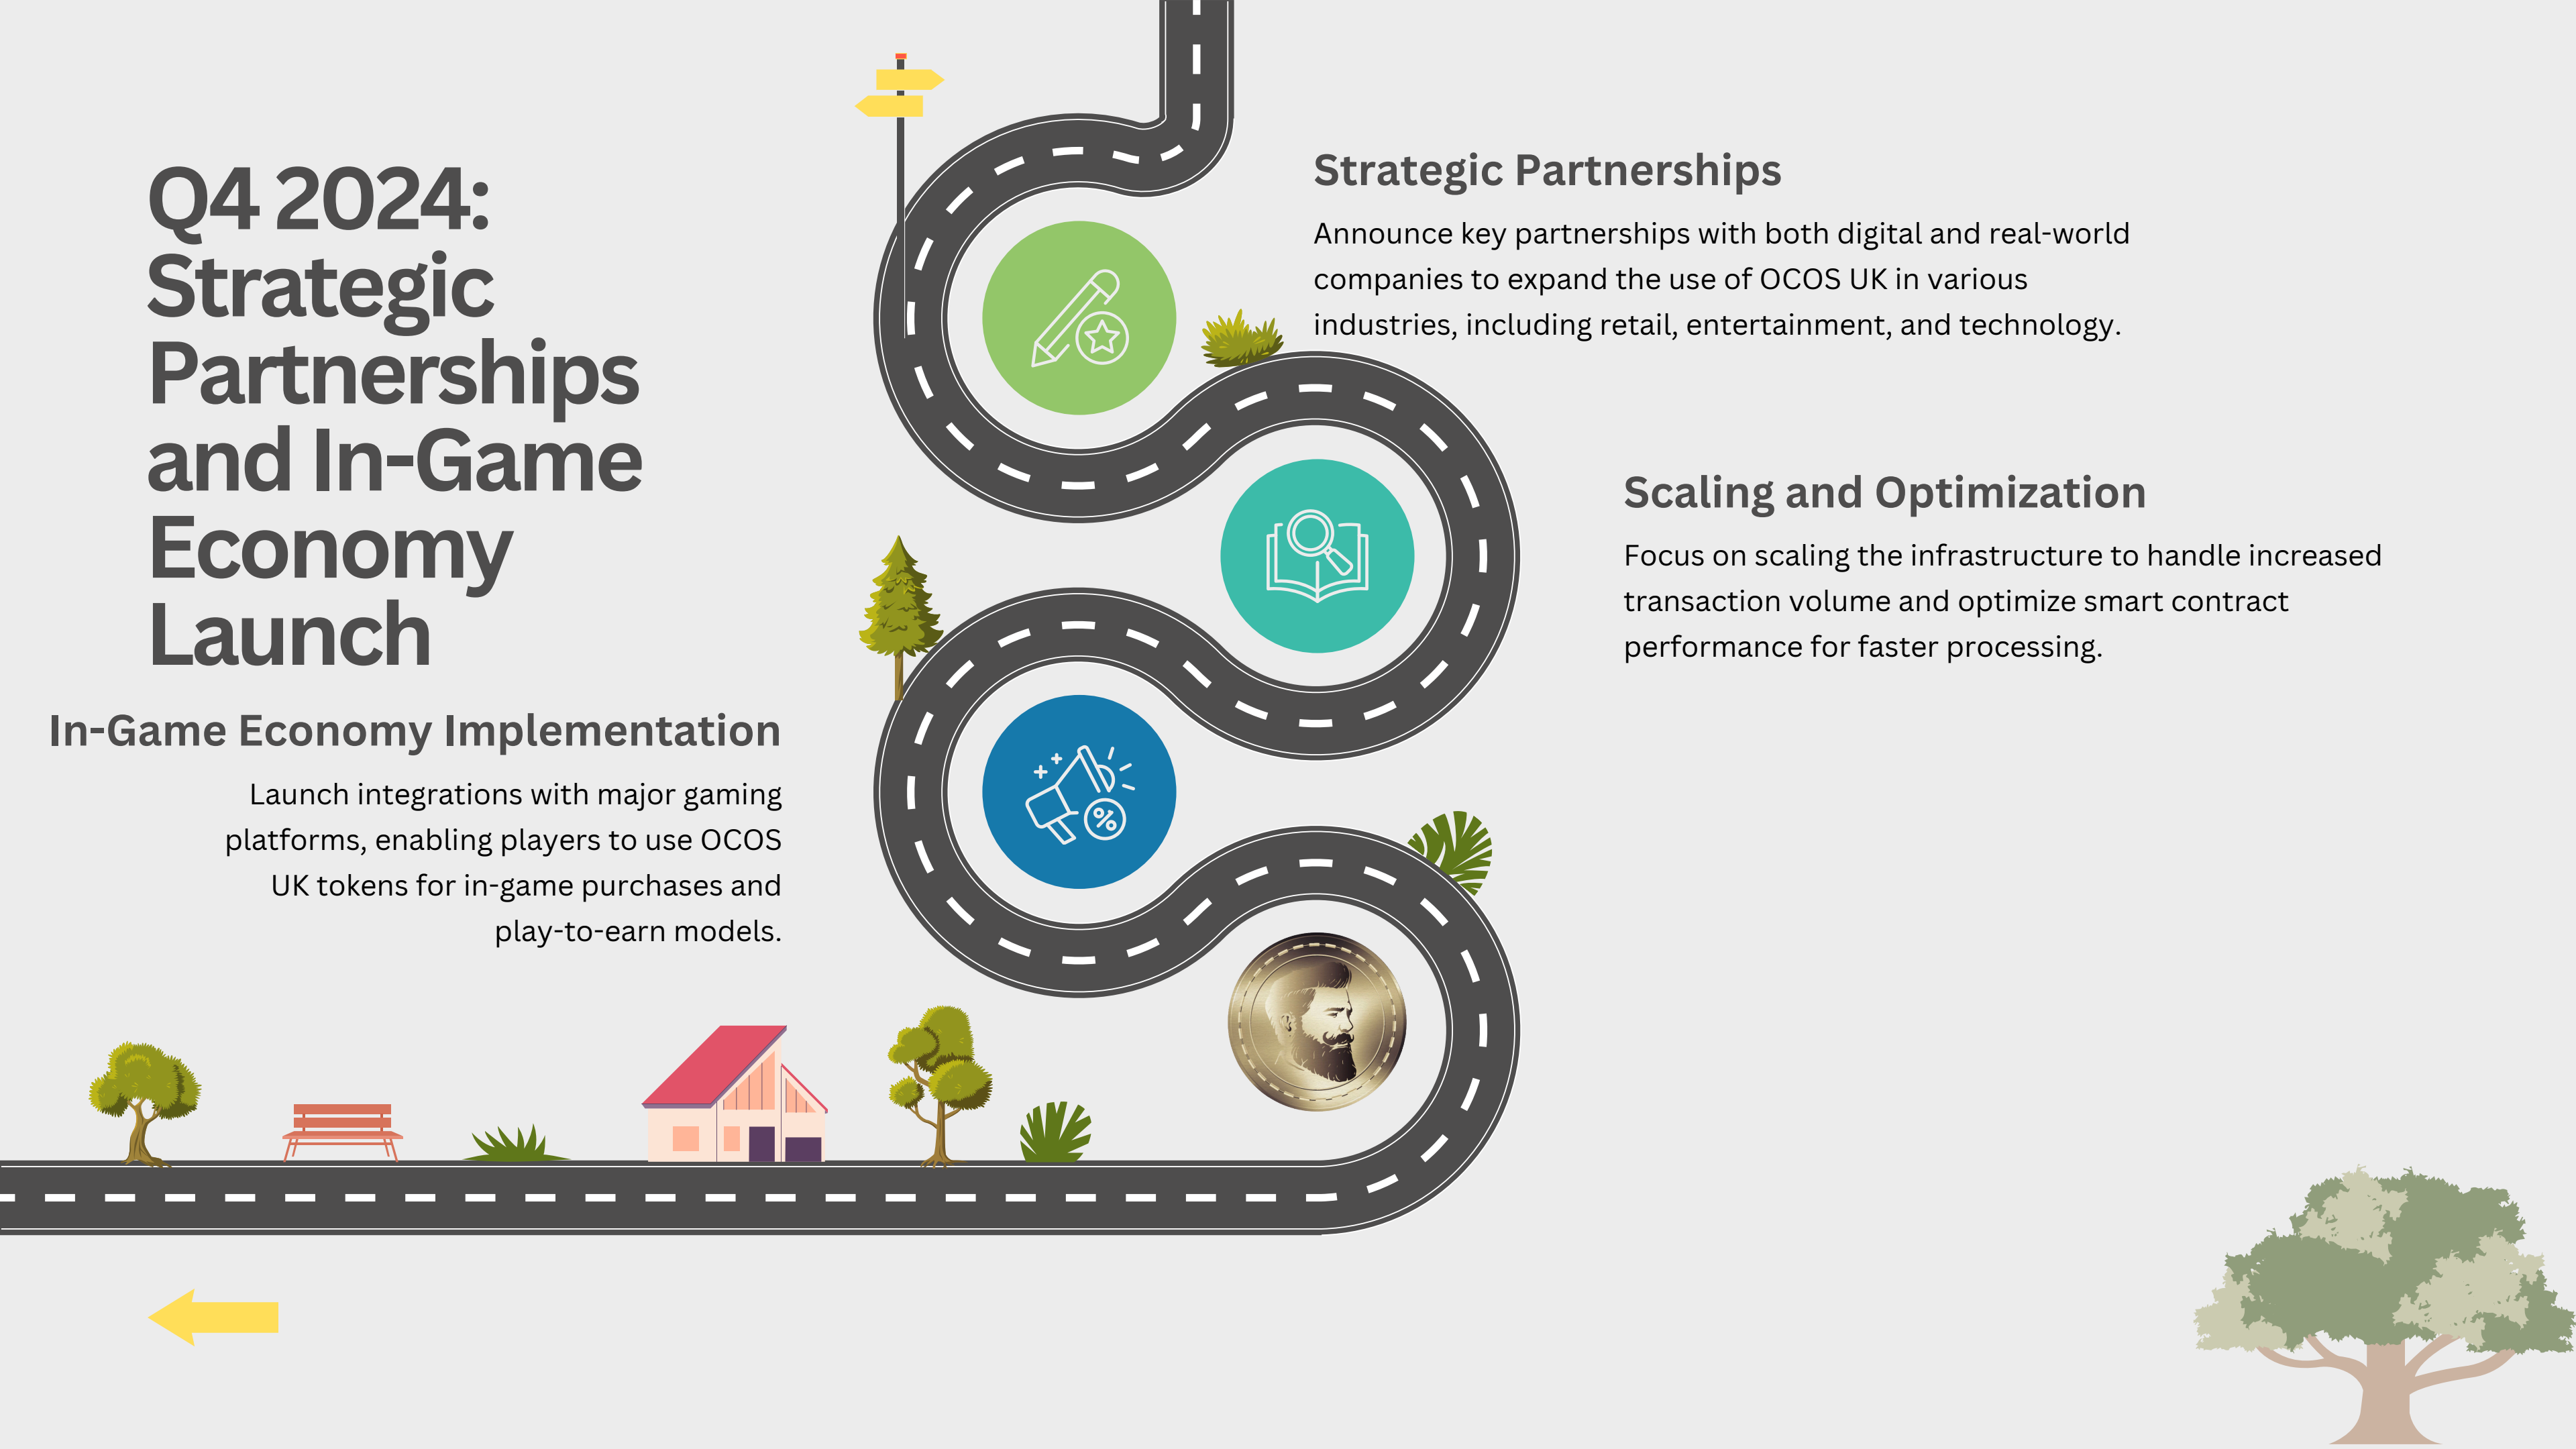

Launch integrations with major gaming platforms, enabling players to use OCOS UK tokens for in-game purchases and play-to-earn models.

Strategic Partnerships

Announce key partnerships with both digital and real-world companies to expand the use of OCOS UK in various industries, including retail, entertainment, and technology.

Scaling and Optimization

Focus on scaling the infrastructure to handle increased transaction volume and optimize smart contract performance for faster processing.

2025 and Beyond: Global Expansion and Industry Penetration

Partnership Expansion

Develop partnerships with global metaverse projects and further penetrate industries such as gaming, digital art, and virtual real estate.

Cross-Platform Integrations

Expand OCOS UK's use cases by integrating with other blockchain networks and platforms, ensuring interoperability and multi-chain compatibility.

Continuous Innovation

Invest in research and development to explore new use cases for OCOS UK, such as bridging digital and physical assets, and enhancing community-driven initiatives.

Global Leadership Positioning

Aim to become a leading token in the digital asset and metaverse economy by offering unique value propositions and continuously evolving the ecosystem.
